Discussion:

This is our first meeting since Winter Term 2016. We all met up and decided to discuss the next steps moving forward as a group for our projects. Andy discussed with us about having a scrum master weekly interchanging, starting with Alice and so forth. We also agreed to create a platform where we create sticky notes for us to have our own tasks and we choose our own tasks at hand. We started discussing tasks beforehand.

Conclusion:

- We create a "Trello" account for us to use a notepad platform for us to choose/delegate tasks.
- We will discuss which tasks are being added as well as which tasks are going to be assigned in our next meeting
- We are going to discuss convenient times for everyone to come together on slack at 7.30PM
